

steps to understanding written language

by Riley Burnham © 2022 open-source ideas

1. transliterating (deciphering/
sounding out the letters/
pronunciation)
2. translating (understanding
meaning of words, parts of words
(compounding))
3. deeper comprehension; probably
writing (which makes good
practice FYI; i recommend poetry
in your chosen language to hand-
write [draw/copy] & transliterate
[American English here] letter-by-
letter; then sound-out/attempt to
translate [comprehend] using
available resources/guides)

*start by printing alphabet/chart
